DETAILED ACTION

1. This Office Action is responding to the Amendment received on 01/18/06.
2. Claims 1-22 are pending.

Response to Arguments

3. Applicant's arguments, see Amendment, filed 01/18/06, with respect to the rejection(s) of claim(s) 1-22 under USC 35 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

Art Unit: 2135

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

6. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

7. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2135

8. Claims 1-23 in this application No. 09844272, hereinafter '272 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 09844439, hereinafter '439. Although the conflicting claims are not identical, they are not patentably distinct from each other because as exemplary Claim 1 in '272 has similar limitations as the exemplary claim 1 in '439, except one. The limitation "said at least one first remote computer system further comprising means for transferring said proprietary information from a storage location through said established communications pipe, wherein said first remote computer system is functionally connected to said network and is functionally communication with said client and said personal security device through said established communications pipe" is not claimed in claim 1 in the '439. Nevertheless, Claim 1 in '439 recites "processing and routing means for transferring authentication challenges received over said network from said subsequent remote computer system to said PSD for authentication through said established communications pipe". The authentication challenges can be interpreted as the said proprietary information. Therefore, Claim 1-23 is obviously anticipated over claims 1-17 of '439.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
